

# Mythic Market Litepaper

*A Community-Driven Platform for Micro Meme Coin Collectibles on Solana*

---

## 1. Introduction

Mythic Market is a community-driven platform featuring low-supply micro meme coin collectibles on Solana, each inspired by mythical gods and launched through transparent community voting. We blend scarcity and fair-launch principles to create truly collectible tokens that reward early believers and foster genuine market-driven price discovery.

## 2. Vision & Mission

**Vision:** Restore trust and integrity to crypto collectibles by ensuring fairness, transparency, and community governance.

**Mission:** Launch a series of 5,000-supply tokens with locked liquidity, no private allocations, and ongoing buybacks and burns, empowering holders and building long-term value.

## 3. Core Principles

- **Complete Openness:** All launch details are public and verifiable. No secret allocations, presales, or insider privileges.
- **Equal Opportunity:** Everyone participates on a level playing field; no reserved shares for teams, VCs, or early backers.
- **Market-Led Value:** Prices emerge exclusively from real supply and demand, free from manipulation or artificial pumping.
- **Locked Liquidity:** Secured LP prevents rug pulls and safeguards community interests.
- **Designed Scarcity:** Fixed supply of 5,000 tokens per collectible promotes rarity and sustainable value.
- **Community First:** Governance and future direction are driven by collective engagement and market feedback.

## 4. How Mythic Market Works

1. **Token Creation:** Each token contract is deployed with exactly 5,000 total supply and metadata pointing to its mythic theme.
2. **Dual Liquidity Pools:** Tokens are paired in either SOL-only or SOL/USDC dual pools via Meteora Dynamic AMM depending on strategy.
3. **Fair Launch:** At a predetermined UTC time set on Meteora, liquidity is added and unlocked for trading immediately on chain. Buyers purchase at market price, no pre-sales or whitelists.
4. **Post-Launch Mechanics:**
  - **Locked LP:** Liquidity remains locked for a transparent duration. Once we grow liquidity will be locked for 1 year minimum, eventually permanently. No liquidity will ever be withdrawn.
  - **Buybacks & Burns:** Announced buyback programs consume trading fees to burn tokens, enhancing scarcity.
5. **Community Voting:** Prior to each launch, token themes (e.g., Zeus, Thor) are chosen by the community via polls, eventually voting integrated on Mythic Market website.

## 5. Key Highlights

- **Fixed 5,000 Supply:** Ensures collectible scarcity and true price discovery.
- **Transparent Process:** No insider deals, fair launch processes, community votes every launch.
- **Locked Liquidity:** Guarantees market integrity and holder protection.
- **Strategic Burns:** Announced buybacks and burns strengthen rarity.
- **Flexible Pools:** SOL/USDC dual or SOL-only pools optimize for fairness and liquidity.

## 6. Token Standards & Specifications

- **Chain:** Solana
- **Supply:** 5,000 tokens (fixed)
- **Decimals:** 9
- **Liquidity Pools:** SOL/USDC dual or SOL-only via Meteora Dynamic AMM (v1 or v2)

**Lock Period:** Weeks/Months at launch. Always will be relocked, no liquidity ever will be withdrawn by Mythic Market. Once we expand, it will be locked for 1 year minimum on each launch or permanently.

## 7. Roadmap

Phase	Milestone	Timeline
<b>Phase 1 - Launch</b>	Launch ARES (Greek God of War) with community voting; deploy initial LP.	Completed (June 2025)
<b>Phase 2 - Expansion</b>	Deploy voted themed tokens (Zeus, Thor, etc.) regularly (initially weekly or bi-weekly). Add integrated on-site voting as the community grows.	Following initial launches
<b>Phase 3 - Ecosystem</b>	Introduce staking rewards for long-term holders. Add Solana betting markets to predict token price movements.	Once Mythic Market matures
<b>Phase 4 - Growth</b>	Launch peer-to-peer swapping on the Mythic Market website. Enable direct token purchases on-site. Explore partnerships with DEXs and broader platforms.	As community demand grows

## 8. Community & Governance

- **Discord & Telegram:** Real-time discussions, AMA sessions, and development updates.
- **X (Twitter):** Official announcements, vote calls, and community highlights.
- **Voting Mechanism:** Straw poll while early, On site polls eventually decide upcoming token themes and strategic parameters.

## 9. Risks & Disclaimer

Meme coins are highly speculative and volatile. While Mythic Market emphasizes fairness and scarcity, price fluctuations and smart contract risks exist. Always conduct your own research (DYOR) and invest responsibly.
